

Nikhil D'Souza

dsouza13@purdue.edu | (805) 490-5055 | nikhiljay.com | github.com/nikhiljay | US Citizen | Eagle Scout

Objective

Seeking an internship with the focus of building something innovative and impactful.

Education

Purdue University – West Lafayette, IN

May 2022

- Bachelor of Science in Computer Science
- Bachelor of Science in Data Science
- GPA: 3.81 (Dean's List & Semester Honors)

Experience

Vincere Health – Harvard Innovation Lab

Oct 2019 - Present

Software Engineer

- Building an app that uses financial incentives, behavioral nudges, and evidence-based interventions to help quit smoking and be healthy.
- Leveraging facial recognition for verification and reinforcement learning to maximize user success.

Taco Bell Corp. – Irvine, CA

May 2019 - Aug 2019

Software Engineering Intern

- Built real-time dashboards to improve digital oversight and business strategy across sales and operations.
- Implemented Elastic stack (Elasticsearch, Logstash, Kibana) and developed an Android app in Kotlin to forward logs and metrics.

Viasat Inc. – Carlsbad, CA

Oct 2018 - Apr 2019

Data Science Intern

- Building an anomaly detection framework that utilizes unsupervised machine learning to detect novel patterns in time series data.
- Using the Generalized ESD algorithm with seasonal decomposition to detect faulty equipment, congestion, and usage anomalies.

Saama Technologies Inc. – Campbell, CA

Jun 2018 - Aug 2018

AI Intern

- Used machine learning techniques to identify packaging anomalies on a conveyor belt.
- Developed CNN with 97% validation accuracy and leveraged image augmentation to expand dataset from 200 to thousands of images.

Projects & Awards

Harvard President's Innovation Challenge – Grand Prize Winner

Jun 2020

- Startup received \$75k for using real-time incentives and behavioral nudges to motivate people to live healthier lives.

Harris Corporation Scholarship – Purdue CS Awards 2019

Apr 2019

- Awarded for excellent academic performance.

Calculating Fatigue of Rugby Athletes – ASA DataFest 2019 (1st Place Overall Winner)

Mar 2019

- Determined real-time fatigue levels of rugby players by identifying impacts, measuring sprint distance, and analyzing health metrics.

Predicting Emerging eSport Celebrities – Krannert eSport Hackathon (3rd Place Overall Winner)

Nov 2018

- Built a tool that scrapes Twitch and social media data to predict emerging viral eSport athletes using IBM Watson sentiment analysis.

GluClose – PennApps XVIII (2nd Place Overall Winner)

Sep 2018

- Built a hack that uses saliva and bacteria in mud to quickly tell if blood glucose concentration is abnormally high.

Apple Worldwide Developer Conference Scholarship Winner – San Francisco, CA

Jun 2015

- One of 350 students selected globally for the WWDC scholarship with the opportunity to attend Apple's developer conference.

Skills

Languages/Tools: Python, R, SQL, React, Typescript, JavaScript, Git, HTML/CSS, Swift, Java, Kotlin, C, Docker, AWS, Redis, Tableau

Focuses: Data Science, AI/Machine Learning, iOS, Web, Android, DevOps, Augmented Reality, UI/UX Design
